Description: I would like to introduce FOLDERizer! 1. FOLDERizer is a cutting edge file manager for the Mac OS X platform, in which you can quickly access your files and folders. 2. FOLDERizer provides an easy way to search files and folders for specific contents, as well as being able to remove or add files and folders to your directory. 3. FOLDERizer can help you create, rename, remove, move, copy and zip files and folders on your Mac. What's New in this Release: * Added option to show search results on top when searching from Finder * Improved the appearance of the terminal window * Added supports for the "bin" and "lnk" file extensions * The 'install' and'remove' buttons now remove the executable as well as the links * Various other small fixes and enhancements FOLDERizer is a free Mac OS X app distributed as a ready-to-use single executable file. It can be used for any purpose such as personal, educational, business or commercial purpose. If you think FOLDERizer would be useful, I would be very grateful if you can rate and leave a review
