A: As @DaftMonkey noted, the top solution is called Toad for SQL Server. I am not aware of any other solutions that have been specifically created for Oracle databases, but since SQL Server/Oracle databases are similar, there should be something similar. Toad for SQL Server This product is very simple and free. While you can try it out, I would not recommend it as a long-term solution, since it is not very customizable or feature-rich. Updates are announced every 3 months. Toad for Oracle This product is also free. The quality seems to be similar to Toad for SQL Server. Updates are announced every 2 months. A: I would suggest Microsoft SQL Server Management Studio which comes with Microsoft SQL Server. It is free to use and is included on every installation of SQL Server 2008 Enterprise. It includes a set of tools to work with SQL Server and is the "Home of SQL Server Management Studio" South
