A wide variety of products or services are commonly stored in portable containers which are often used for various purposes. For example, products such as tools, bicycles, recreational equipment, and other items may be transported by a variety of transportation means, e.g., car, truck, boat, etc., and often these products must be stored or transported in portable containers. Additionally, some products, such as wheeled carts, strollers, etc., have a storage capacity which is limited to a certain size. As a result, there is a demand for larger sized containers that will allow larger quantities of products to be easily stored or transported. For certain items, such as wheeled carts, there is a demand for a container having the ability to retain a large quantity of articles such that the cart may be easily loaded, while at the same time providing sufficient stability to the cart to allow it to be loaded and unloaded from the container. Moreover, it is desirable for such containers to be easily convertible between a two-sided open configuration and a two-sided closed configuration such that the container may be placed into service as a storage container and then later converted back into a serviceable cart. In the prior art, such containers have been made from various materials such as metal, wood, cardboard, plastic, etc., but a problem associated with many such prior art containers is that they are subject to damage, and/or they require a great deal of effort to convert from one configuration to the other. Accordingly, it would be advantageous to provide a container which is stable, can be stacked or nested, is easy to convert between a two-sided open configuration and a two-sided closed configuration, and which is durable. Just days after his company, Theranos, was accused of conducting clinical trials on its controversial blood tests, Elizabeth Holmes has quit. She was one of the most hyped people in technology. How did she fall so fast? The tech world is now buzzing with stories of how Theranos was making bold promises and business plans with no expertise or knowledge behind them. It' 54b84cb42d
