Mac Data Recovery is a lightweight utility designed to help you restore documents, photos as well as media files that you accidentally or intentionally deleted from your Mac. Clean, structured and easy-to-use interface

Mac Data Recovery is an intuitive application that is designed to help you restore data on your Mac. Upon launch, you are required to specify the category of data

you are trying to restore. All in all, you are then required to specify the exact file and click the scan button. The software then scans the entire storage space on your Mac in an instant. Depending on the type of data, it can take anywhere between a few to a few minutes to scan the storage location and display the results. To narrow down your search and find the file you are looking for, you can type a keyword in the search field or click the column headings that relate to the types of files. Allows you to restore files with just one click Like any other application, Mac Data Recovery also includes a search field that you can use to search for the data that you want to restore. Mac Data Recovery Description:

----- Mac Data Recovery is a lightweight utility designed to help you restore documents, photos as well as media files that you accidentally or intentionally deleted from your Mac. Clean, structured and easy-to-use interface Mac Data Recovery is an intuitive application that is designed to help you restore data on your Mac. Upon launch, you are required to specify the category of data you are trying to restore. All in all, you are then required to specify the exact file and click the scan button. The software then scans the entire storage space on your Mac

Akick Data Recovery enables you to restore lost or deleted files from computer devices such as your desktop, PC, laptop, removable drives, including USB flash drives and memory cards. Akick Data Recovery is a simple, easy to use application, without complicated installation or other processes to handle. It detects and scans the hard disk drive to see what has been deleted and then displays the files along with the modification, date, type and size. In addition, it also lists the files by modification date, the path where the files are stored and the number of changes. Furthermore, you can recover deleted files quickly and easily.
