#I NEED TO TRANSLATE MY VODs FOR MYGFXM2 PLEASE HELP! The only thing I can think of is to use UPX on the jpg to make it go 2mb which does make it look a lot better as I can now Whether they translate your stuff right, or not is another question. The biggest problem is that A) they don't tell you there's a lot of jpg stuff in there, and B) a lot of it is just really bad quality. It is up to you to fix the stuff yourself, or if you wish to pay for faster VOD translation, you can try a site like Bittorrent. Also, in case you used the standard VOD to PVR feature in XBMC, you might get the whole series in one go. If the torrent you have isn't as good, you might need to split them into separate movie files (one per ep, one for each season, etc) or download them independently with XBMC. Google Cardboard One of the O.C. characters, Seth Cohen's, visor is featured in the iPhone 6s and iPhone 6s Plus. Where is the special Transcoder app? WARNING This is not the original x.264 torrent.
