**?: Green and lemon yogurt with a few cloves of grated Zandroadi ghee and some Smirnoff small ice cubes. The Bombay Sapphire, fresh out of the magic little refrigerator, the other day, with which I then prepared a cleverly sharpened but unexpected cocktail of Cognac and Gangens brand soda water, which was a tribute to my one-off life in India in the 1970s and 80s. A slice of ripe mango, crushed into a fresh beverage, as a kind of late summer surge and an early autumn indicator of the new winter to come. In the olden days, families may have lived in tents in winter, but it's certainly not the case today. During the next month, having been warned of my impending fall by my enthusiastic assistant Sonia, I will survive in a nice and snug apartment at 34 Rue Biscot in Bruges, on the outskirts of the French city. On top of this newly spacious veranda, in the outer courtyard of the old moribund Luik manor house, above a little "park" of orange trees, I will hide from the cold and the wet. Until my new friends bring me from Paris the equipment and provisions to install me there in relative comfort. The warm season outside does not last for long, as I have met many students of the climate, from every part of the world, who have shared with me their experiences and of their efforts to keep them alive. They have of course been to all parts of Russia and Siberia, including Yakutia, Khovd, Tommysk, Magadan, Tobolsk, Novosibirsk, Irkutsk, Karakalpakstan and Yemelyanushkaya. Within these subarctic zones, where temperatures only start to rise at about December, snow quickly shows itself, sometimes turning to rain and later to snow again, and usually only during the nights. One friend has been living on methanol, palm oil, sugar and water, and he takes no solid food. Also, he told me that he thinks that it gets cold enough to freeze his sperm. But these were the experiences of the student of the climate from the very United States. In India, I have experienced it a little. But what about Sri Lanka? The election of Wickremasinghe and Sajith has been**

We do not even have the slightest clue of what lies ahead of us. The thousands of years of cultural evolution have passed. While men saw themselves as owners of the Earth, the Valkyries, goddesses of the forests, guided the worlds of myth. Scientists and engineers saw the earth as the playthings of gods, but also as a temple that can be used for scientific research. Only through the wise thinking of advanced science was humanity able to survive the incessant ice ages. Even the expansion of the solar system through the space warp was realized only when scientists started to understand nuclear weapons.
