command prompts. Drag and drop: drag objects from one drawing to another, with no additional steps required. New snap function allows you to choose the default snap type for common paper and non-paper objects, so your drafting tasks become more efficient. Parallel processes: use multiple threads or processors in the background to support multi-tasking. For example, rendering, importing, printing and analysis can all happen simultaneously, without interfering with each other. SmartPath: Use the most efficient and consistent path for drawing objects, regardless of the shape. Refine edges: remove unnecessary, redundant or repetitive segments in the path of an object, keeping only the most efficient path. Use the new SmartEdit command, to edit the object as you move it. Improvements for the web: Use the AutoCAD web application to gain more efficiency in the workplace, wherever you are. Improvements to enterprise-specific features: Add special formatting to the review comments and comments fields, for more flexibility. Improvements in the AutoCAD Cloud user experience:
