What's new in Chasm:

Heroes Of Hellas 4: Birth Of Legend Heroes Of Hellas 4: Birth Of Legend - Original Hungarian name: Az arany 5: Üdülés - Heroes of Hellas 4: Birth of Legend - Ukraine is a nod to the short name, Ukraine. I had to write the history of the game, because the myth that it was always about gods and nerds present in the Player Base is a misunderstanding. Like any production with a significant budget or budget produce, just about every

new game that I do, the first version is different of the final version of the final version of the module or game. So, the game started as an RPG, because my vision and experience in the Polish Bio-Computing was that it needed to be the RPG: I wasn't ready to play non-RPG games. I was also not ready to appear as the trail mix of the modules, because I believe a game like Heroes of, a more light and "boring" atypical game, may have turned out better as a full module RPG, but my busy schedule in the modest part of Los Angeles, did not allow me then. However, my goal was to translate it into a game, so I put a hybrid game and already had a tentative players view. The first act of the game is the prequel to a most famous tradition. One of the the greatest rituals of pagan religions was the creation of the first human. That myth is available in many traditions and it always has a very simple roots, as a creation. In the Ukrainian myths, the hellas is a week-long ritual for creating gods that included battles, ceremonies, sacrifices, and central council. The purposes of these rituals were the creation of living gods, the protection of living people and the state. I took these rituals and made it the core of the game and the American myth - from our culture. Its story revolves around the creation of the mythical hero and the god of the story. Will the heroes live or leave the home that created? In this ritual, it is assumed to the birth of the gods. Birth is the creation of life and god-creating is not life. From this concept, each card of the game is associated to a ritual: Canes sapiens, a ritual for the creation of humans that is really an invention of man and helpful gods, is a bit dumber and lacks a strong sense of purpose. He creates the first seed of people - pecans, and

Gam3 is a quirky indie game about perseverance and working together cooperatively to defeat hordes of zombies. It's an enjoyable game that can be played at a variety of difficulty levels. Zombies have invaded the Earth and it's your job to stop them! You've been captured and forced into one of the many zombie occupied kingdoms. You must escape through the jungles of America - a dangerous journey. You have a short window of time to recruit a team, complete

your objectives, and end the zombie menace. Don't be afraid to play alone though, as with a team of helpful friends you will be able to overcome the odds. Features: Awesome Australian voice acting and game music with over 10 minutes of the very best soundtrack ever made, creating an epic sound that will move you. Awesomeness factor at an all-time high. 5 different difficulty settings. Addictive, fun gameplay. Use your teammates effectively. Randomly generated map (8x8 grid) with optional auto-saves. Experience the opening of the game with the above trailer. About I MAED A GAM3 WITH ZOMBIES

How To Play The Game The Medic:

- **If you obtain the patch version of The Medic do not forget to check if you have the single player mode enabled via the CheckBox of the file game.cfg. If you do have it enabled (SET WORKING_PLAYER_MODE_BEFORE_GAME = 1) please save the file as called game.cfg and replace the new one. The folder game_work have to have write permission.**
- **Start the game and enjoy the medic mode (Medics are just more weapons in the Single Player mode).**

When this release is released, there will be a zipfile with normal

version AND a patched version of the old release. This way in the future you could point your game at the old map and minimise the amount of work for the customer.

If you want to help out, the patches are easy to make and would be welcome, after all this old map is over 10 years old and shows some signs of wear. However, I'd recommend you to take a look at how Medic was implemented on the Game Factory III project (www.censoft.com/wm/) and make the patch from that. That project already has all the data needed by The Medic, and all you need to do is to develop some software tools to use as a base and modify it for The Medic.

So guys and girls, just a short reminder how the Spam patching system works. If you can read and understand that, you can patch every map!

Why... The "Spam" Patch?

When the map files need to be patched, the editor actually create a second set of files. This files are patches and they are applied in order to the file to be modified.
