Blood and Bone: a fantasy MMORPG where the world is burning, and humanity has been crushed. In the Lands Between, the winds blow, and the shadows appear, leading to hidden danger. In this war-torn world, there is an oppressed race of strong warriors called the Amazons whose hearts are full of joy and hope. These Amazons are constantly being hunted. The Elden Ring, which was created by the mysterious man who moved mountains, has become their savior. To protect the survivors, there is a legend of a new archetype of demon, the malevolent inheritor of the Chaos King named the Promised One. After the birth of the Promised One, the Amazons will be cleansed and turned into Amazons.

Introduction {#Sec1} ===== The clinical success of endoscopic ultrasound (EUS) guided fine needle aspiration (FNA) for the diagnosis of gastrointestinal (GI) and pancreatic neoplasms is important to direct the staging of disease and therapy. A recent large retrospective analysis has shown that EUS-guided FNA has a sensitivity of 77% to 90% for staging lymph nodes \[@CR1\]. In a review of studies performed between 1998 and 2008, the overall sensitivity of EUS-guided FNA for the diagnosis of metastatic lymph nodes was 85% \[@CR2\]. Using a combination of EUS-guided FNA and endoscopic ultrasonography (EUS), the sensitivity of diagnosis of lymph node metastases can be increased up to 95% \[@CR3\]. Also, the sensitivity of EUS-guided fine needle biopsy (FNB) for the diagnosis of gastrointestinal stromal tumor (GIST) has been shown to be high (88%) \[@CR4\]. The main problem with the EUS-guided FNA and FNB technique is the size and number of needles required to remove the tissue which leads to a high cost and a need for patient sedation or anesthesia. To overcome the issues of the size of the needle, a new technique was developed based on the use of a 18-gauge needle for FNA or a 22-gauge needle for FNB from the EUS image (Fig. [1](#Fig1){ref-type="fig"}). Fig. 1**a** EUS-guided FNA for the diagnosis of a duodenal (D) lymph node. A 19-gauge FNA needle is used to aspirate tissue from the D lymph node. **b** EUS-guided FNB for the diagnosis of a left subcarinal (S

an proved its playboy chief foreign affairs adviser, Sartaj Aziz, wrong on one thing. He never said Pakistan was to be poor. Instead, he said the country was born to be poor and then a poor country could be built up by the y having an identity. Aziz said at one of his many media sponsored talks in Washington: "This is the birth of a y. We have forged an identity that has given us pride, our own identity that was ours... we can say that ally this identity has come to us without even thinking about it." There, he forgot to mention that the whole y was forged by the British. The birth of a country, it seems, rather than the birth of a poor (or formerly, a ation to become poor. Although Pakistan itself was not born poor when it got independence it was no less an the countries that got independence in the same era. A new Pew survey on economic conditions in an shows the country's per capita income over the last 20 years has hardly moved, while a large majority still from poverty. Worse, there is little hope to offset the consequences of rising poverty. New Zealand, like an, was born poor. Yet it didn't stay poor. Did Pakistanis become poor while it lacked an identity? On what an we say that "our" identity made Pakistan poor, when all the rich countries in the region had better es — sometimes even better than Pakistan? Nations get poor by being poor and by not having any new ideas ould lead to economic progress. If Pakistan's identity is a business beano, an oasis of swanking and horse- it can hardly claim the right not to be poor. It may not be fair to use a better-than-the-worst-apart figure to "poor". Many poorer countries, like Laos,
