A new urban adventure game with a fresh perspective, multiple challenges. This game is shaped by a deep cyberpunk sentiment, bringing forth the android world in which we all live today.

CYBERPUNK WORLD FEELThe game is a very addictive platformer with challenges to overcome, while exploring the broken city. Set in a futuristic world, people are living their every day working 24/7 and having no time to go out to the parks and party together. CYBERPUNK INSPIRATION Based on the Cyberpunk vision of a broken world where people lack ambition, they are living in a world where "They only care to survive". The environment reflects this concept with the floating blocks in the air, broken structures, lack of natural beauty and deteriorating city. Colors and atmosphere, inspired by The Matrix and Blade Runner. Thumbs up for this game. The story is very interesting, as it's about the life of a S.O.B living in the digital world and he's not even human. The gameplay is very fast paced and the game is very well designed. The music and sound effects are also great. The author has done a great job, as the game is way beyond any other games I've played so far. Highly recommended. The storyline is interesting, but some parts of the game were a little too frikkin' hard. Sure, I was nuking the blocks. But in some levels it takes multiple tries to pass the levels. If I fail, there's no save game and I lose precious time. And also, when saving time in one stage, the total time is reset for the next stages which is stupid. It's like wanting to save time in one level, and then later, failing all the levels, losing it all just because the time was reset. It's not balanced. I'm being a little bit TOO hard on the game, sure. The text is small, I'm sure it can be read at various screen resolutions. Still, it's a great game. The options are a bit jumbled, but once they are straightened out, it's a really, really fun experience. Good Game Great game. My only complaint is the lack of save saves. My score was approaching 1000 on the game and I was so close to getting the secret thing. Then I figured out the save/load thing and played it forever

## **Features Key:**

it's a shooting game!

It's available at iPhone, Android store

Tap your way through the Krazy Clown Family...bad jokes they are, bad puns they are, bad punsters they are!

Navigate your way through the crazy shooty-donkey-kung-fu themed landscape...it's amazing!

Tip #1: Make sure you're on a 3G or 4G WiFi connection. If not, try Wifi. If on, try playing the game on your mobile data plan. Try saving some space and put the game on your SD Card. Tap Ads on the main screen and tap the ad to remove them for good.

Tip #2: You can save apps onto your SD Card and re-install them later, so if you don't like the game don't remove it (you can remove the app on the iPhone).

Tip #3: You can request support. Please stop by

Experience the adrenaline rush of blind arcade platforming! In a world where the remaining magic has been used up, humans have lost their ability to control their bodies. The power of the world is now in the hands of cybernetic beings called Vector Tanks. Their sole purpose is to exterminate you. Luckily, you can turn any of these into your personal wall. Your goal is to survive over 140 challenging levels of veg-beast infested fun. Anyone can do it. It's all up to you. **ADDITIONAL INFORMATION / DISCUSSION:** We hope you enjoy Veg Man! 1.1.1 - More awesome game skins! - Bugfixes 1.0 - First release! 1.0.5 - Minor bug fixes 1.0.4 - Important bug fix for Mac OSX 10.12.x that prevents it from running 1.0.3 - Added Universal Binary for Mac OSX and iOS 1.0.2 - Additional bugfixes 1.0.1 - Fixed: Borderless Window mode doesn't support certain screen resolutions. 1.0 - First public release! 1.0.3 - New feature: Support for Magic Trackpad! 1.0.2 - Minor bug fixes 1.0.1 - Minor bug fixes 1.0 - First public release! 0.9 - Added support for controllers 1.0 - First public release! **Q: Python - finding the last element in an array while altering other elements in the array** Here is my problem: A problem in my code is that I think I am altering the last element in my array while determining what is the index of that element. I'm pretty sure that the if statement is overwriting my current index. I don't know how else to state my problem: 

```
# Creating a List of new words wordlist = [] for word in word_list: if word not in wordlist: wordlist.append(word) # Determining the position of the last element in wordlist print(wordlist[-1], wordlist.index(wordlist[-1])) # Now that wordlist contains a wordlist of c9d1549cdd
```

### **What's new in Emerald Shores:**

**. Product Information This expansion pack is the single most exciting addition to Cubecade since the very first release in 2007. In this expansion you'll be able to create, place and move more interactive Cubo Paws in the world and than take interactive care of them. Cubicruits feature highly realistic digital fur which either blends with or protrudes from the surface, all on top of fully scannable floors which allow you to read their indoor temperatures, scans of their UV level and even their personality, all automatically updated in the background, so that you'll never have to even touch the map. Now you can place your Cubecarps, simply create a new one using your Keyboard and then place it in the exact 3D location you want. The Cubecarps will instantly start scanning about their most recent environment, and tend to like what they found. The Cubecarps also get to name the car park so that you can keep track of them individually and even order them in a neatly labeled queue and even create a new car park if you run out, or if you want a new one. Cubecarps also like the UV levels of their car parks, and react differently to there UV levels. The new expansion pack even brings cardboard boxes for the Cubecarps to use in their new house. The**

**Cubecarps will move crates about the car parks and wall around the house automatically. You can also create more than one Cubecarps in the same map, each with their own unique personality and based on a combination of their UV level and the UV levels of their environment. The Cubecarps also have an expanding belly button because all they eat comes out of their belly and it always grows bigger than their car park it's in. The Cubecarps also like to evolve over time, laying some sort of egg and even eventually becoming able to fly. You can enjoy these Cubecarps free in Cubecade, or upgrade for \$2.99. Unlockable Content Here is a list of all the unlockables contained within Cubiscape 2, as well as a list of each of them, the contents of the unlockables and which servers you can access them on.
