Notes: The match is won when the hive counts that are displayed in the top-right corner of the map are equal to or lower than the available bonus hive counts. Sky pirates: The amount of victory points depends

---

on the number of sky pirates on the map. At least three are needed for victory. No sky pirates: A victory point can only be earned if at least five skypirates are destroyed. Four hundred victory points are awarded for destroying the four skypirates.

By destroying one ship per hive turret, you can earn victory points. This way, the game will be over as soon as you destroy a skypirate. However, you'll automatically hit the bonus achievement for destroying all skypirates. Thus you should destroy each skypirate to collect all victory points. Each hive turret is worth 20 victory points. In order to destroy a hive turret, you have to move close enough and destroy it. Any ship that was in

---

range at the time of the explosion is destroyed. A hovering hive turret can be destroyed in one hit. Hive turret at the end of a bridge:

Destroying the hive turret that guards the end of a bridge: Wall of metal: In order to destroy this wall, you need a ground vehicle with a tank. After that, enter the ground vehicle and shoot the wall. Single server matches: The match is won
