ACRD - This is an Architectural Component Repository. ACRD is a tool that can be run on the Design Manager Client that uses the ACRD to manage and catalog the basic architectural elements. ADAC - This is an Architectural Documentation Application Component that is used for creating and editing architectural documentation for AutoCAD. ADAS - This is an Architectural Design and Analysis System. ADAS allows for the user to create and manage architectural drawings in a 3D format. This is accomplished by using CAD models as 3D "drawings" which are "rendered" in 3D to produce a displayable image. ADAE - This is an Architectural Design and Analysis Environment. The goal of this environment is to serve as a platform for architectural and mechanical drawings to be created. ADAE is powered by Microsoft Visual Studio and Microsoft.NET. This is an Integrated Development Environment that includes a programming environment, a 3D viewer, and more. AD-4A - This is an Architectural Design Application. AD-4A allows for AutoCAD users to create 3D architectural and mechanical drawings. AD-4A's user interface is designed to allow users to easily work with all of the architectural elements. AD-4A's functionality is enhanced by the ADE (Architectural Design and Editing) package, which allows for the user to create and edit architectural drawings in a 3D format. Q: How to remove old SSIS solution items? I have recently upgraded my SSIS 2012 to SSIS 2014. I have several old solutions I have been working on. I have been using them all but now the process has been moved to a new server. Is there any way to delete the projects from my server and then re-import them? I know it will take time to download the projects again but it seems like it will take a long time to re-import them into Visual Studio 2012 as it requires you to manually connect to an instance of the SQL Server. A: In a visual studio 2015 solution, you simply click the dropdown arrow beside the solution and choose "Remove and add solution...". A: I found a good article on removing the package history from an SSIS project. Platinum Top The Platinum Top is a paid annual subscription service designed for NBA fans.
