
Authentic Love Presets ACR ((LINK))

i've used these in lr and ps.. just in general i find them very subtle and helpful. they can add a nice little pop to your image without being over the top. i also love the option to save the presets back to the original. its an added bonus! thank you! the tricia has been another amazing release from tvp. i have been using these presets for a few months now and i absolutely love the results. they give any portrait images a dreamy, cinematic quality and really pull out the best of the subject. i love the varied tones the presets give me from the lightest shades of blue to the deepest blacks. they really make your images pop and i love to use them for any portrait images. i will definitely be purchasing more presets from tvp. this new preset pack from tvp is a real winner! the presets in this pack make your images look and feel like they were shot on location. they are truly beautiful. i couldnt stop playing with the different settings for hours. i cant wait to get some more use out of these presets. i love how they give you the look of film but arent quite so expensive. they really are a dream come true! these new presets by tricia are simply amazing! i love how they give a cinematic feel to your images, the amazing warmth and depth they give is outstanding. i have used them for portraits, weddings, lifestyle and everything in between. you can really get some unique looks with them! they are very simple to use and their price is very reasonable. i definitely would recommend these presets to anyone. they are an amazing addition to your arsenal and i'm sure they will continue to be popular as time goes on.
