download and install the steam software on your pc. steam is a widely used platform for gamers to download and install games from the steam store. we will use steam to install dehkhoda persian dictionary on windows pc. after installing, sign in with the same account that you have created in step 1. open your steam folder (the one which contains the steam desktop icon and contains the downloaded steam games etc) and go to the “steamapps” folder. in the applied sciences of linguistics and cognitive science, language acquisition and language learning are seen as closely related cognitive processes. the more people are exposed to the language, the more they will come to be able to understand it. exposure to a mother tongue in the early years of life—in this case, farsi—reliably increases the probability that a person will acquire it as a second (or later) language when exposed to it later in life. this is an example of social language learning in the wild, which has been confirmed scientifically. this kind of exposure can be in family, school, or on one’s own. but this doesn’t solve the dilemma. because the mother tongue itself is learned through interactions with others, it is not easy to learn the mother tongue when one is alone. and those who have learned the language in the wild know that it is the interactions with others, not the language itself, which is the skill to learn. so, we have already learnt about farsi before the web. the importance of it as a mother tongue was also discussed in our earlier article . so, the next step would be to get a language book. this is a very important part of language learning. for example, dehkhoda farsi dictionary contains 926 pages and contains about 120,000 words and 80,000 farsi sentences (around 16 hours of audio, 1 cd). you can use it offline for self learning. 5ec8ef588b
