

the wicker man was a british film that wasn't made in the uk. it was shot in the town of st. andrews in fife, scotland. it's also the first film to win the prestigious palme d'or at cannes. in one of the most interesting things about the wicker man is that it was made with a small budget and was a box office failure. despite this, it's one of the most revered cult movies, in part because it was made by a young robin hardy. the film is also noteworthy because of how seriously it takes its story, and how focused the script is on the characters. the summerisle is surrounded by a magical fence, and every bit of it is organic. hardy's

film covers the same amount of ground as Stewart's, but with a tighter script and tighter production values. A lot of the film's more visual effects are accomplished through a combination of practical effects and visual effects, and the film's opening scene is a tour de force in visual effects. For the most part, the effects don't completely overpower the film, but they are an important part of the film's atmosphere. The Wicker Man also stands out for its casting, and Hardy's portrayal of Howie is the best ever. Lee, Richard Harris, and Edward Woodward all give believable performances, and the script hews closely to the book. In fact, the biggest difference between this and the book is that the film actually is a mystery, although the answer is somewhat obvious. Hardy and cinematographer John Hough did a wonderful job of creating a realistic and believable version of the Wicker Man, and the film is also just as enjoyable for people

who don't read the book.

The Wicker Man 2006 Film Torrent

while the best version of the wicker man is robin hardy's original 1973 cut, this new restoration of the film is easily the best of all the versions i've seen, in part because of the restoration job done on the prints. considering how hard it is to locate old prints, it's quite surprising that the 70mm print of the wicker man has been sitting around for a decade, only now being released on blu-ray. however, there's a big difference between this blu-ray and the previous releases; this one is in anamorphic widescreen, while the previous two were cropped and letterboxed. i'm not sure if it was the problem that the previous prints were a little soft, or if they were too bright, but this new version is by far the best looking of all the home video versions i've seen. it's well-lit, and quite a bit darker

than the previous versions, which are mostly black-and-white now. the disc also boasts a brand new commentary track from robin hardy, who reveals that he had some trouble with the final cut; in particular, the length of the movie bothered him the most. he also offers a few other insights on the movie, including his thoughts on how the wicker man was affected by the success of the omen, which was released three months after the film's original release. like many horror movies, the best moments in the wicker man are when the script is least involved with the action. the story of a man obsessed with the idea of a pagan cult and how it affects a small scottish town is the best part of the movie. the opening scene of the burned-out, seaside town with gothic churches and tower-like structures, and how the characters interact with each other is where the movie's best moments take place. the extended dialogue and the

character development of may morrison (geraldine cowper) and her husband andy (aidan mcardle) is where the script gets a little long-winded. however, it's also where the script is at its most intriguing.
