JetBee is a practical and simple-to-use software utility whose main purpose is to help you burn all types of files to CDs, DVDs or Blu-ray discs. Simple and well-structured interface The main window of the application is

split into three sections. The first one allows you to browse through your hard drive partitions to select the files and folders you want to burn on discs. While the second section is basically the working area, the place where projects are created and files are added using the drag and drop method or the file browser. The third section displays information about the program's operations. You can create several

projects that burn data, audio, DVD or UDF to discs. Plus, you can easily switch between projects to play audio tracks, add more files or remove extra ones. Burning various types of files to DVD, CD or Blu-ray discs it is an extremely easy and fast process. Before beginning the burn process, you have the possibility of choosing how many disc copies you need and the desired writing method, namely Track-at-

Once, Disc-at-Once or Session-at-Once. Thus, depending on your needs and available resources, you can record tracks individually or the entire disc within a single session. Additionally, you can create bootable discs and burn ISO images onto discs, while being able to select the writing speed, the number of duplicates and render further writing on the disc impossible. Besides saving discs or tracks to image,

burning and copying data to discs, you can also use the Discography feature. This feature keeps track of all the contents of every disc you burn and helps you find information about what data was burnt, when it was burnt and the type of disc burnt. Furthermore, you can erase data from discs provided that the discs are rewritable ones. To clear disc contents you can choose between 'Quick Erase' or 'Full Erase'

methods. The difference between them is that one deletes only the table of contents, while the other one empties all disc contents. Overall, JetBee proves to be a handy software utility that comes packed with a wide set of features that enables you to efficiently burn any data to various discs without too much hassle. Plus, the program is hardly noticeable since it minimizes to Systray. System requirements

JetBee Serial Key

This macro recorder is capable of recording all of your keystrokes from any program. You can select from over 100 keystrokes and they

will be recorded and logged. You can also record mouse movements. For each log entry, a program ID is given for your convenience. You can have as many macros as you want and they will be listed for you when you run the macro recorder. Each macro entry can also be triggered by pressing a hotkey, a mouse click, or simply a keyboard stroke. The program records all the hotkeys on the keyboard:

every command on every key, not just the hotkeys that are already assigned. It also records the functions of the hotkeys, such as going to a web site, launching a program, starting a game, etc. All your keyboard commands are logged as WM_* log messages. You can even use macros to record mouse movements, mouse clicks, mouse double-clicks, and mouse rollovers. There is no limit to the number of

hotkeys that you can record. There are more than 100 hotkeys defined and this allows you to have a lot of macros. Macros can be triggered by any event. You can choose to have a macro launch when you start Windows, when you exit Windows, when a button is pressed, when a menu option is selected, when a menu item is selected, when an application opens, when an application closes, etc.
