## What's New In Portable CdrTfe?

Key Features: The CD and DVD burning processes take place in a single window. The discs can be created directly from a folder or a file, as well as from a file on a file system. The data on the disc can be CD-Text, RLE, CD-DA, AC-3, LPCM, WAV, FLAC, M4A, OGG, OGA, or M4P. The compression level (the Overburn algorithm) is set. The layout options of the disc can be edited. Completely customizable with a large number of settings. Multiple writer capability, which can be shared with the host system. The operations performed on the files are listed in the status area, allowing you to easily navigate through your files. The discs can be saved as a.cfp file, which can be opened with any version of Windows. The software is absolutely free. The size of the disc in KBytes can be limited to a certain size (128, 256, or 512 KBytes). Multimedia data can be burned directly to the disc. Audiocodes can be burned in the Audio CD format. Multimedia files can be burned to the DVD. Multimedia files can be burned to the DVD directly from a folder. Supported devices:  
Writers: &
