Overview The Mindjet MindManager Suite is a powerful, unified software solution for creating and managing enterprise content. With MindManager, you have one intuitive, Web-based application to build your whole workflow, from visual design and creation to publication. Whether you are an individual or a team, with MindManager, you can easily create any amount of content. Another outstanding product for user level management system I'm very satisfied with the program i purchased. It can hold the software licenses for many users and we can easily reset the software license number in order to check license. It has some limitations, but that's normal in this kind of software. I highly recommend this software and i'll do my best to make the best use of it, and be as fast as possible. Very good I use this program to keep track of all my software (programs) and hardware, and it is very user friendly. I am able to use it for both personal and professional use, and I can organize and manage my information well. The program has a good support network and overall is a great program. Very Good it's very easy to use. it's very good program to install and have in your work. and the license number for the users can be changed. with this i feel more safer when using this program. and I recommend for all people. it's good for business. Very Useful I'm a computer science student. the first and most important thing for me is the security. with the program license number can be changed. if the program is infected with virus, the license number is changed and cannot be used for downloading the software. i would like to recommed this program to everyone. Good i like it because it easy to use. with this program, we can control license number for each users. It is very good. I am a student and i like to keep the license number for each users.
