I can export the database schema as SQL, but how can I export an image from a "CMS-page"? A: You can export (copy) the image from the page using the export form in the "Import" menu. This will export it as if it were a "normal" page - ie with all the standard links. This invention relates to a capacitive probe for determining the level of an electrically conductive medium in a tank and a method of determining the level of the electrically conductive medium in a tank. In particular, this invention relates to the use of a capacitive probe in connection with a gas hydrate forming system for determining the level of the electrically conductive medium in a supercritical water gas hydrate forming system and to the use of a capacitive probe in connection with a supercritical water hydrate forming system for determining the level of the electrically conductive medium in a supercritical water hydrate forming system. A supercritical water gas hydrate forming system is a gas hydrate forming system in which at least one electrically conductive medium is maintained at a level less than the critical point of the electrically conductive medium. Supercritical water gas hydrate forming systems are widely known and described in, for example, PCT patent publication No. WO 00/37528 and U.S. Pat. No. 6,017,406, which are incorporated herein by reference. The use of a capacitive probe in a supercritical water hydrate forming system for determining the level of an electrically conductive medium in a supercritical water gas hydrate forming system is also known
