What's New in the MtnGUI?

This program captures full screen digital images and screenshots, with high quality. It works with all versions of windows, starting from Windows 2000 to Windows 8. 2.. Description: Create "screenshots" of webpages using an easy and quick tool.The Software allows you to save the images, which you find on the web pages, into JPEG, GIF or PNG images in batches. A private web page can be displayed on your own computer screen so that anyone else with access to the computer will not be able to see your login, passwords or credit card details. If the web page is private, then it will not be saved either. . Description: The screenshot tool was developed to help me take advantage of the natural benefits of screenshot technology: You can take a "screenshot" of your entire computer screen, record a video of your screen, or record a sound of your screen. Also the program can do the job of an effective virtual private network or a Virtual Private Screen (VPS). Description: This is a free, open-source, cross-platform, real-time screencasting and screen recording software for Windows. In addition to audio, it supports recording of the mouse movements and gestures, and it allows to easily capture what's on the screen using the keyboard and mouse without the need to use the mouse. It supports more than 30 languages. . Description: Screencast-O-Matic is a powerful desktop application that enables you to easily create web videos that can be embedded on any site. Screencast-O-Matic is so simple to use that you can record your screen activity and upload it to the web within minutes! The Screencast-O-Matic application comes with a variety of screen capture tools that let you capture a screen area, a window, or the whole screen. . Description: It allows you to record what you are seeing on your screen. It is a time-saving solution to remember and record web pages you want to bookmark or reference. Screenshot is a free software that captures your screen. You can take a screenshot of the whole screen, a rectangular area or a specific window. You can crop it to crop only the content you want, add a text or a logo to make it more professional, resize it or generate different file formats such as JPEG, TIFF, PNG and GIF. . Description: Screencast-O-Matic is a powerful desktop application that enables you to easily create web videos that can be embedded on any site. Screencast-O-Matic is so simple to use that you can record your screen activity and upload it to the web within minutes! The Screencast-O-Matic application comes with a variety of screen capture tools that let you capture a screen area, a window, or the whole screen. .
