**How to Fix Sunspots Using the Auto Tone**

Sometimes, when I'm creating a design, a sunspot will appear in one of my photos. While Photoshop

has a *Tone Matching* feature, it can't remove the large area of the sunspot. **Shapes and Paths**  
You can use shapes to create attention grabbing typography and graphic elements. With some creative tweaking, you can make these graphics look extremely professional and effective.

### **Adjustments**

Adjustments are often used to decrease images or increase the clarity and exposure of an image. With adjustments, you can lower the contrast in an image to make it more "vintage" or place a soft blur on parts of a photo to soften dark shadows and bright highlights. Generally, you'll start with an image that has not been graded at 100%, and then make adjustments to bring the image to that level. It's always come as a surprise when an image format that has been around for decades fails to be backward-compatible with the element in the modern web - which is where Photoshop image layers and Smart Objects have been since the very first release. I've been using Adobe Photoshop for years, but when I saw it was announced for the web, I had to wait for version 1.0 to get some. (I'm still anxiously awaiting Photoshop for Web for the best convenience—versus just opening files in the browser—of course.) Sure, it has its limitations. But Photoshop CS4 was such a powerful tool, and one of the best ways I know to develop my skills, that it's worth getting used to being beholden to the current version of the software. And relying on the internet makes it even better. e3d0a04c9c

The Photoshop elements already have these features and I can easily hop in and out of Elements and Photoshop to accomplish the same edits. The main downside to this is that it will likely take longer to learn how to use Elements to the same degree as Photoshop. Recent updates to Photoshop have made it easier than ever to use large web fonts in your designs. Now you can select and easily add fonts to your web pages and share them with other designers and colleagues.
